This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

PREFACE.

The genealogy of Virginian families has, for obvious reasons, been regarded to be of peculiar interest. It would hardly be too much to say that Bishop Meade's "Old Churches and Families of Virginia" is a corner-stone in the edifice of American genealogical lore, and that there has been no "long-felt want" more pressing than that for a satisfactory index and digest of this great work.

The compiler of the following pages lays claim to no credit beyond that which is due to the accurate performance of an uncommonly laborious task. So great, in Bishop Meade's work, is the number of names to be included in even the simplest index that the making of this would be no slight matter, and this labor has been vastly increased by the compiler's design to identify the individuals mentioned and to present, along with the index, a digest of important facts recorded in the book. It is matter of regret that students have not had, from the beginning, access to a full and accurate digested index to this work; not so much because of the time wasted for want of such a help as for the reason that most of them, lacking this guide, have largely forborne to attempt to use the well-nigh boundless treasure of personal and public history within these pages. It will surely, then, be matter of congratulation to all who are interested in historical research and its results that now, at last, such a digested index is presented, as it is a matter of gratification to the compiler that he now proffers to the thirsty a "seasoned gourd" with which they may dip from another's spring the sweetest water of which is often beyond the reach of the casual passer-by.

I wish to acknowledge my indebtedness to my friend, Mr. John Hart, of Richmond, Va., who has given me valued assistance at every point of this work.

JENNINGS CROPPER WISE.
